AQUATOOLS SECURES AN ECOVADIS GOLD MEDAL!

In January 2024, AQUATOOLS achieved the “gold” level standard of EcoVadis rating, with a score of 73/100 for its second year of participation. This assessment demonstrates the company’s commitment, and remarkable performance in the areas of the environment, social and human rights, as well as ethics.

ECOVADIS

EcoVadis is an organisation which specialises in the evaluation of Corporate Social Responsibility (CSR) performance. It examines the way in which companies integrate CSR principles into their operations, and it evaluates their impact.

The score, awarded on a scale of 0 to 100, reflects the quality of management of CSR at the time of assessment. This latter is based on four main criteria: the environment, social and human rights, ethics and responsible purchasing.

To date, more than 125,000 companies in 180 countries have been assessed by EcoVadis. Each assessment is personalised to take account of the CSR issues specifically related to the company evaluated, depending on its size, its sector of activity and its geographic location.

These criteria are aligned with international CSR standards such as the UN Global Compact principles, the ISO 26 000 standard and the International Labour Organisation (ILO) conventions.

AQUATOOLS secures a gold medal!

With a score of 73/100, AQUATOOLS is delighted to have obtained the EcoVadis gold medal for its second year of participation in this rigorous evaluation. This feat represents a notable 10-point improvement over the previous evaluation in November 2022, positioning AQUATOOLS in the prestigious leading group of the top 5% of companies evaluated by EcoVadis in the sector of activity with an overall score between 70 and 77.

ISO 14001:2015 certified, our company particularly stands out in the “Environment” category where it achieved a remarkable score of 90/100. This distinction highlights AQUATOOLS’ ongoing efforts to integrate the principles of social responsibility within its core activity, and reflects our commitment to exemplary environmental management.

This recognition from EcoVadis is the result of our constant commitment to improving our policies and actions, adopting innovative and sustainable practices that meet our CSR objectives.

The EcoVadis gold medal is proof-positive of our determination to move towards excellence in sustainability, motivating AQUATOOLS to redouble its efforts and strengthen its commitment to a better future.

About AQUATOOLS

AQUATOOLS is a French company specialising in the production of advanced solutions for water hygiene, in particular anti-legionella and all-germ point-of-use filters for healthcare facilities and non-medical establishments open to the public (hotels, accommodation, campsites, etc.).

Thanks to sustained investment in Research and Development, and close collaboration with scientific experts, AQUATOOLS has quickly established itself as a key player in the point-of-use filtration sector.

The exceptional quality and performance of our filters position us, today, as a market leader in France and a leading player on the international scene, with subsidiaries opening in the United States in 2017, in the United Kingdom in 2023, and in Germany in 2024. Committed to sustainability, we are determined to develop responsible practices that reflect our deep commitment to social responsibility and the environment, as evidenced by our recent distinction with the EcoVadis gold medal.
